OVERVIEW

This stick formula hard texture is possible thanks to a mix of two oil thickening polymers : Estogel® M which brings strength and Estogel® Green which brings elasticity. Sustane™ SAIB Food Grade is added as a film former enabling an even application of the stick. Eastman GEM™ Retinyl Sunflowerate and Elastyl™ CC-MB were added as anti-ageing actives, whereas Ubi Oléoactif® is used for improving uneven skin tone. Quintup™ CC-MB boosts these benefits by restoring skin firmness as well as Inca Inchi® WO Organic Lipactive which promotes regeneration and hydration.
