EMULSION

OVERVIEW

This emulsion-in-gel formula is built around key functional ingredients selected for both performance and sensory balance. In the emulsion part, Montanov™ 202 acts as a naturally derived O/W emulsifier, ensuring emulsion stability while providing a smooth and creamy skin feel. SAFIC' Care T XG Clear P supports emulsion structuring and stability by improving viscosity and suspension, while maintaining a clear and homogeneous texture. The emollient system, composed of Lipex® SheaSoft TR™ and Lipex® 205, delivers nourishment, softness, and long-lasting comfort, while Lipex® SheaLuxe TR™ enhances spreadability and provides a light, silky after-feel. In the gel part, Sepimax™ Zen builds a fresh and elastic gel network, contributing to lightness, freshness, and excellent rheological stability.
